

## Fairy-doorplate

Make your own sign in your quite personal empire for you!

**What do you need:** Thin cardboard  
Scissors, glue  
Optional: Glitter glue for decorating

### Instructions:

First, create a base for your doorplate – to which a magical fairy figure will be glued! How about a heart, a flower, a simple square or rectangle, or a star?

Next, you need a circle cut from the thin cardboard – this is for your fairy's dress! As a template, you could draw around a plate with a pencil. Fold the circle in half, and then in half again across the middle. Now you have a cross on your circle.

Carefully cut out one of the four quadrats from the circle, following the folded lines. Set aside this cut-out cone piece for later.

Now take the rest of the circle, with its two points pointing upwards. Draw wings at the two creases. The lower cone will be the fairy's dress. If you glue the wings to your base, the dress will extend out from the paper.

Draw a face for the fairy and cut this out. Glue it to the base over the dress and between the wings of the fairy.

Take two strips of paper and fold them into a concertina. These are the fairy's two legs, and can be glued to the base below the fairy's dress. Now all that are missing are the arms. For these, use the cones that you cut out of the cardboard circle at the beginning. Then glue the two arms onto the fairy (either on the dress or the wings). To finish, decorate the doorplate using glitter glue.

### Fairy tip:

We love glittery clothes! Decorate your fairy's dress too, using the glitter glue.

Enjoy your doorplate!
